Press Release: Puppies found on Preston Ave in Middletown.

Sunday, January 6, 2019 just before noon the Middletown Police Department received a call from a resident about a bag of deceased puppies found on the side of Preston Ave. Preliminary investigation revealed that the puppies were approximately two weeks old, black in color with some white on chin, chest, and feet. The puppies were all male and appeared to be a possible poodle or cocker spaniel mixed breed.

The puppies were transported to Pieper Olsen where they were examined and stored until they could be transported to the lab for a necropsy to determine the cause of death. It was estimated that the puppies had been deceased for a few hours.

The Middletown Animal Control officers will be conducting an investigation into the death of these puppies. Someone may know of a dog that just had puppies and they are no longer around. These puppies would have been too young to adopt and should have remained with their mother. If anyone had any information, please contact the Middletown Animal Control Officers at 860-638-4030.
