

Recreation Recycles : Bird Feeders

February 2021

Here's some fun bird feeders to make out of recycled materials! Our feathered friends could use help in the winter and these feeders are simple and fun to make.

Recycling Tip:

All these feeders are made out of materials that normally would go into the recycling container. But once you turn them into bird feeders, they can no longer be recycled. Some will last quite a while, but once they have run their course, they would have to go into the regular trash.
