This email was sent by someone outside of the City of Middletown.

I am writing to request one more 90 day extension of the time to file mylars for my two lot resubdivision. They are having trouble finding a builder,so I'd rather get the extension just in case.

Thanks

You will have to coordinate with our surveyor to print a mylar map and help draft the legal description of the new lot. You may need an attorney to help with that but your surveyor can advise. I'd like that submitted sometime in early March because I have to coordinate with the Planning and Zoning Commission Chair to sign the map. Who knows what business will be like with covid and everything so more time you give us the better. You do have the ability ask for one more 90 day extension. If you want to do that then send me another email sometime in February/March to give us some lead time.

I see extension was approved. Is there anything else I have to do before April?

Thanks,

Marylou
