Marek,

That is correct. The health department can approve the application for a hookah lounge at 695 South Main Street as long as no food and/or beverages are prepared or served.

Hi Kevin, as discussed, your initial comments denied the proposal because they would not be allowed a kitchen as indicated on the plans. After discussing your comments with the applicant, he told me that space will be used for the preparation of the tobacco. Furthermore, no food or beverage will be prepared or sold at the premise. In light of this information, would you be able to revise your comments if you see fit? Let me know. Thanks

Marek
