

General Inspections:

Please call the Building Department (860-638-4870) to schedule directly with office staff. Emailed requests for inspections will not be scheduled. If you receive voicemail, please leave your name, phone number, address where the inspection is needed, and a brief description of type of inspection being requested. We schedule 7-10 days in advance. During the summer months we are sometimes 2+ weeks out on scheduling so please take that into consideration when planning projects.

Permits need to be fully paid and issued in order to schedule inspections (this includes mechanical permitting required in relation to a building permit project).

****If a project fails inspection 2 times for the same portion of the job a \$75.00 fee will be required to be paid BEFORE a 3rd reinspection can be scheduled.****
