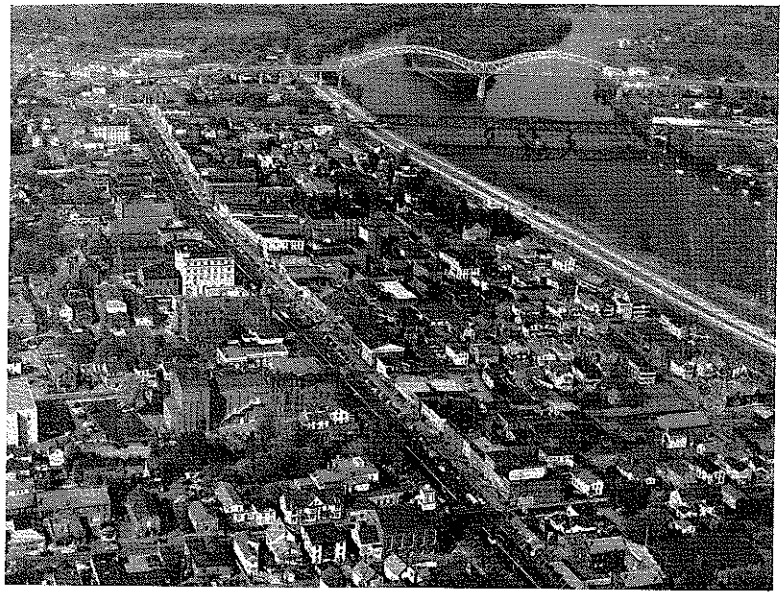
A Brief History of Middletown, Connecticut



Middletown, Conn. located on the Connecticut River, has one of the longest and widest main streets in New England.

Middletown, Conn.. was settled in 1650 by families chiefly from Hartford and partly from Wethersfield. The settlement, on the "big bend" of the Connecticut River, was known by its Indian name of Mattabesett until November, 1653, when the General Court changed it to Middletown. The original township included territory that later became the towns of Middlefield, Portland, Cromwell and a portion of Berlin.

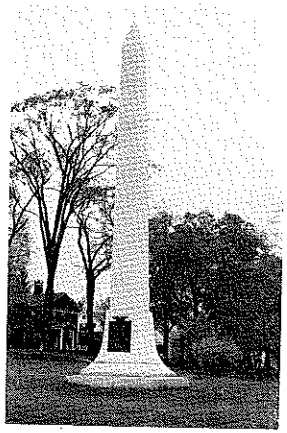
Town records for the first two years were lost or never kept. However, records of the town from 1652 are complete and the first recorded public vote was for a meeting-house completed that year. The settlers were energetic and hard workers, who obtained their living from the soil or from their ingenuity and the skill of their hands in making articles necessary for the little community.

The population increased slowly but steadily. By 1750 Middletown became one of the largest towns in Connecticut and the most important port. The town was a shipbuilding center and a large and profitable trade with foreign countries developed. Commerce also built up the farming interests so that the agriculturists as well as the merchants were prosperous and could indulge in home and educational luxuries.

Trade with foreign countries had the effect of rounding off corners and smoothing rough places thus making Middletown noted for refinement and cultivation. It was the wealthiest and most cultivated town in New England, the greatest commercial center between New York and Boston.

The prosperity of Middletown, however, was suspended while the Revolutionary War was being fought. The news of the closing of the port of Boston in 1774 stirred the people of Middletown more than any other New England town, for besides the spirit of patriotism which they shared equally with all New England, there was the serious financial blow to commercial interests of this principal shipping port. Their unselfish patriotism, which the present generation regards as one of its most valued legacies, supported the first Continental Congress in any action they might take against the "unrighteous" act of the British Government, even to total abolition of trade with the West Indies and Europe.

When the final break came in 1776 Middletown's officers and privates in the Revolution were many and distinguished for their unwavering patriotism and skill in the profession of arms. In every succeeding war and national emergency Middletown's sons have gone forth to do honor to their country and their city.



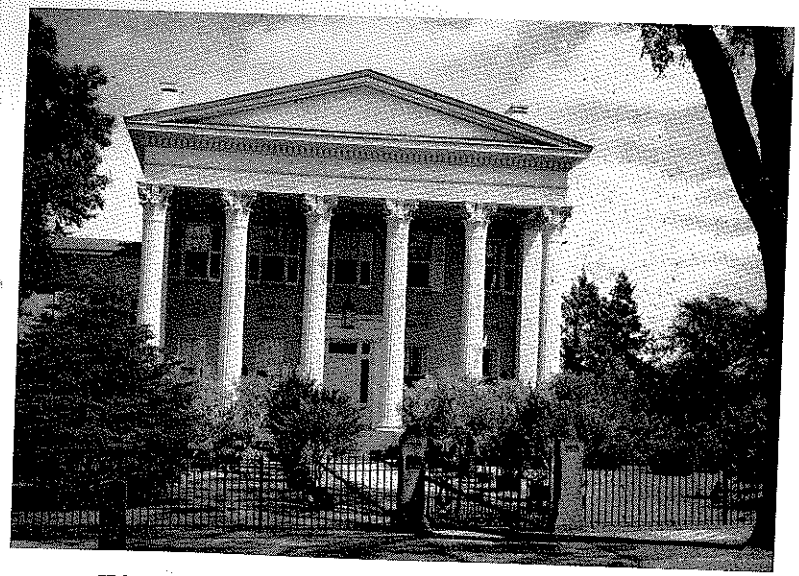
WORLD WAR MONUMENT

The City of Middletown was incorporated in May, 1784. Although it continued to be among the largest communities in population in the state, its people were concentrated in the immediate area along the river. The principal commercial activities of the town were connected with shipping and life centered on Main Street which parallels the river banks.

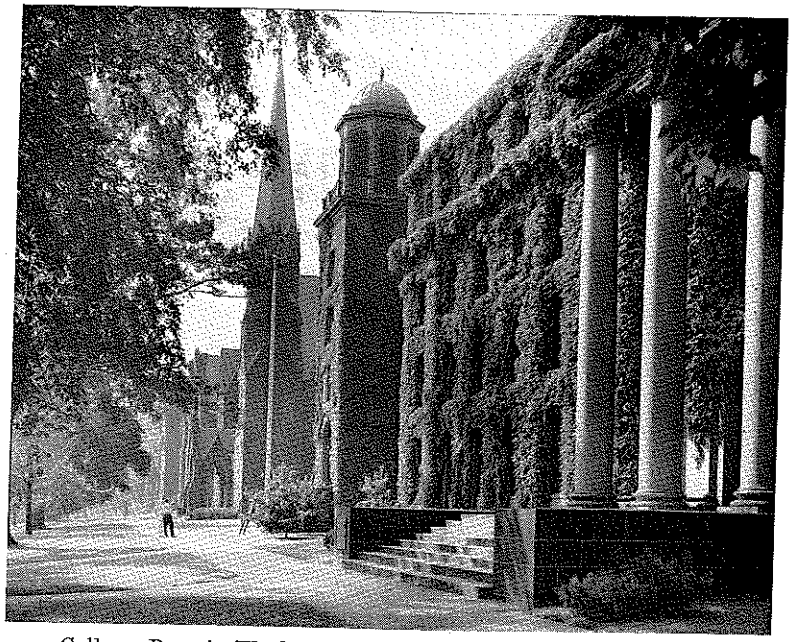
From the first settlement of the town much attention had been paid to religion and education. The first public worship in Middletown was held under the shade of a grand old elm tree. Today there are twenty-one fine church buildings serving over eight religious denominations.

The public schools of the city have always been known for their excellence. The Middletown High School was the first educational institution of its kind in Connecticut. In 1839 the General Assembly passed an act creating the "City School Society" and the following year a high school was established in rooms under the Episcopal Church. Rev. Alfred Sax, a professor at Wesleyan, was the first principal.

In 1831 Wesleyan University began its honorable and useful existence, receiving a charter from the General Assembly after a public and private subscription had been raised by Middletown's citizens amounting to $18,000. An additional $22,000 was raised by the Methodist Episcopal Church to form the original endowment of $40,000 asked by the former owners of the university buildings. Wesleyan today is a non-denominational college of liberal arts and sciences.



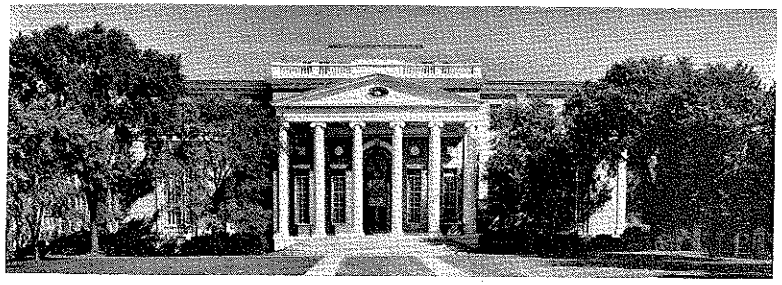
HONORS COLLEGE, WESLEYAN UNIVERSITY
Wesleyan's Honors College is the former Russell House built in 1828. It was given to the College by Thomas M. Russell, Jr., in 1936.



College Row is Wesleyan's oldest group of buildings. South College (with the cupola) was built in 1824, seven years before the founding of the College. The brownstone for these buildings was quarried in Portland.

Shanklin Laboratory of Biology and Hall Laboratory of Chemistry as seen from Olin Memorial Library, looking across Church Street.

Middletown's growth was slowed following the American Revolution. The merchants, who never could recoup their war losses, turned to manufacturing. In place of West India shipping came busy factories turning out the variety of products which started the city's growth along different lines.



OLIN MEMORIAL LIBRARY

First there were woolens, firearms and ammunition for the Civil War, then later marine products, narrow fabrics, lace, rubber goods, fertilizers and now electronics, machine tools, dies, metal boxes, silverware, automotive accessories, brake lining, clothing and many other items which are distributed and sold all over the world. There are now over 65 important industrial companies in Middletown.

Today Middletown is a city of 35,000, the county seat of Middlesex County, on the Connecticut River 15 miles south of the capital at Hartford, and the natural center of a trading area containing over 75,000 people. The excellent system of highways criss-crossing the county and state make Middletown easily accessible from any quarter of the state. It is the home of an insurance company organized in 1836 and some of its financial institutions rank among the oldest in the nation. Its modern shops and stores are among the finest in New England and offer a wide variety of merchandise. Middletown's business services, professional people, hospital, public utilities and civic groups offer every type of service essential to modern living and health requirements.

Middletown and Middlesex County provide a vacationist's paradise. Here or within a few miles are found boating, swimming, fishing, camps, golf, everything needed to enjoy life at its fullest. Middletown's residential areas are known far and wide for combining beautiful examples of early old American homes with the modern functional design of present-day houses.

In 1895 a group of Middletown businessmen formed "The Society for the Encouragement of Connecticut Manufactories" which in December, 1910 was incorporated as the Manufacturers Association of Connecticut. For over 300 years the business people and the citizens of Middletown have been working and living together, developing a spirit of mutual understanding which encourages and supports the growth of the city and its business and cultural activities. The leadership that its strong men gave it over the long years has brought Middletown to its present standing as a good place in which to live, work and play. Our people look forward to many prosperous and happy years because of the typical determination of every good American family to "do better" by their children than they did by themselves.

Names Appearing In Black Letters

IN THIS DIRECTORY are the names of those people who ACCOMPLISH THINGS and are entitled to favorable consideration, if for no other reason than their public-spirited support of measures which make for progress. They represent that ENERGY AND PUSH so essential to the commercial prosperity of the City, and in dealing with them no mistake will be made. The publishers are honored in thus making them better known to the public.

MIDDLETOWN NUMERICAL DIRECTORY

EXPLANATORY NOTES

The streets are arranged alphabetically with their descriptions, each description followed by a numerical arrangement of householders, places of business and street intersections. (Arranged by rotation where no numbers have been assigned.)

The abbreviation r between the street number and the name signifies "rear."

The word "vacant" after a number signifies that the house, office or store at that number was vacant when the canvass was made.

🕭 Indicates telephone at this number.

"Right even" after street description indicates even numbers on right side of street.

The symbol ◎ following a householder's name indicates that information has been secured during the canvass that the house is owned by some member of the family, but as the publishers cannot and do not guarantee the correctness of the information furnished, nor the complete absence of mistakes, no responsibility for errors can be or is assumed, nor can the publishers furnish further information than that shown.

Names Appearing In Black Letters

IN THIS DIRECTORY are the names of those people who ACCOMPLISH THINGS and are entitled to favorable consideration, if for no other reason than their public-spirited support of measures which make for progress. They represent that ENERGY AND PUSH so essential to the commercial prosperity of the City, and in dealing with them no mistake will be made. The publishers are honored in thus making them better known to the public.
