the Librarian of Congress at Washington.

INTRODUCTORY.

We present our first edition of the Middletown and Portland Directory to our patrons and the public, trusting that it will meet with their approbation and commend itself to their support. The canvass has been made from house to house by experienced canvassers, and we have spared neither time or expense to make it correct and reliable. There are, doubtless, errors and omissions, but we are confident they are few and such, only as unavoidably occur in a work of this kind. To those who have encouraged us with their patronage, we extend our thanks, trusting in future editions to merit a continuance of the same.

We remain respectfully,

PRICE, LEE & Co.

—ALSO—

THE STILES MACHINISTS' TOOL GRINDER.

1-12 FULL SIZE.

The use of corundum wheels, in water, for grinding Lathe, Planer, and other tools has become a necessity. They must supersede the grindstone of the past, for obvious reasons, viz.:

They will grind faster and more accurately than the grindstone.

They will grind tools of all kinds without affecting the temper of the steel.

They impart a cutting edge quite unattainable on the grindstone.

They will grind tools of any shape.

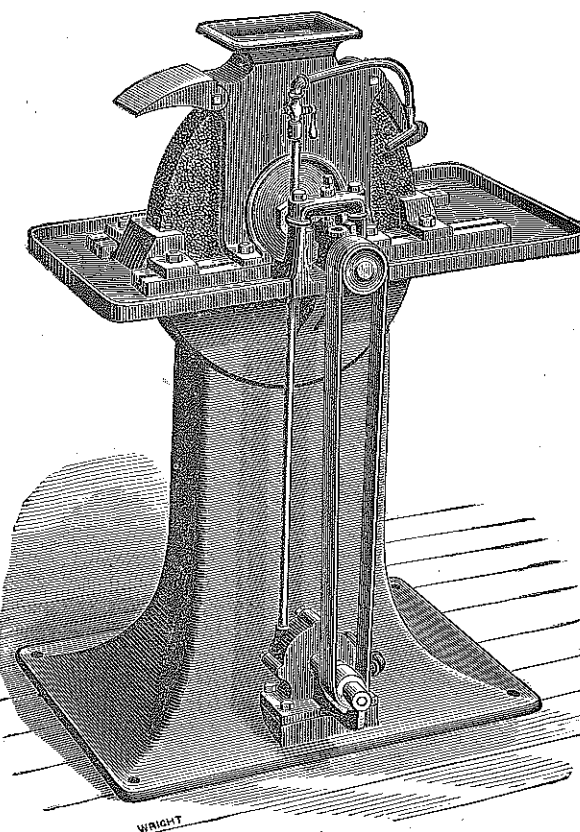

They less frequently require truing up, and when this process is necessary there is no dust, dirt or trouble as with the grindstone.

They are cheaper, and will last longer than the grindstone.

The wheel is 18 in diameter by 2 1-2 in. thick. WEIGHT ABOUT 700 LBS.
